

#17: BST Remove

October 5, 2018 · Wade Fagen-Ulmschneider

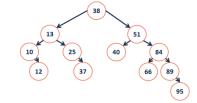

```
BST.cpp

template <class K, class V>
void BST::_insert(TreeNode *& root, K & key, V & value) {
   TreeNode *t = _find(root, key);
   t = new TreeNode(key, value);
}
```

Running time? _____ Bound by? ____

What happens when we run the bugged code above?

How do we fix the code?

Removing an element from a BST:

remove(40)

remove(25)

remove(10)

remove (13)

| 38 | 8 | |
|-------------|----------------|--|
| 13 25 12 37 | 51 84 66 89 95 | |

| One-child Remove | Two-child remove | | |
|------------------|------------------|--|--|
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |
| | | | |

```
BinaryTree.cpp

template <class K, class V>
void BST::_remove(TreeNode *& root, const K & key) {
```

BST Analysis:

Every operation we have studied on a BST depends on:

...what is this in terms of the amount of data, n?

BST – Simple Proofs

Q: Given a height **h**, what is the <u>maximum</u> number of nodes (**n**) in a valid BST of height **h**? Provide an outline of a proof.

Q: Given a height **h**, what is the <u>minimum</u> number of nodes (**n**) in a valid BST of height **h**? Provide an outline of a proof.

Final BST Analysis

For every height-based algorithm on a BST:

Lower Bound:

Upper Bound:

Why use a BST over a linked list?

Q: How does our data determine the height?

1324576

vs.

4236715

 $\mathbf{Q:}\ \mathbf{How}\ \mathbf{many}\ \mathbf{different}\ \mathbf{ways}\ \mathbf{are}\ \mathbf{there}\ \mathbf{to}\ \mathbf{insert}\ \mathbf{data}\ \mathbf{into}\ \mathbf{a}\ \mathbf{BST?}$

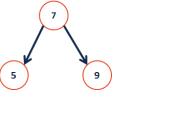

Q: What is the average height of every arrangement?

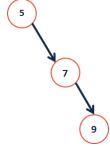

...what is the intuition here?

| operation | BST Avg. Case | BST Worst Case | Sorted Array | Sorted List |
|-----------|------------------|-------------------|-----------------|-------------|
| find | 11.8. 0450 | Worst case | ıııı | |
| insert | | | | |
| delete | | | | |
| traverse | | | | |

Height Balance on BST

What tree makes you happier?

We define the **height balance** (b) of a BST to be:

We define a BST tree T to be **height balanced** if:

CS 225 – Things To Be Doing:

- 1. Theory Exam 2 starts next Thursday (topic list is available now!)
- 2. MP3 due Monday; MP4 released on Tuesday
- 3. lab_trees is due Sunday, Feb. 25
- 4. Daily POTDs
