

Subject: Physics 101: Welcome

Good afternoon,

You are receiving this email because you are enrolled in Physics 101 for the Fall 2024 semester. For those of you who are new to campus, welcome! And for those of you who are returning, welcome back! I look forward to meeting you and creating our class community this semester.

As you get ready for the semester to begin, please visit (and bookmark) the [Physics 101 website](#), where you will find what you need to know about **class meetings**, **online assignments**, and **action items** for Week 1 of the semester. Additionally, I highly recommend reviewing the following parts of the course website:

- [What you need to do to be ready for each part of class](#)
- [What you should do about course attendance if you are sick](#)
- [An overview of the course and its various components and policies](#)
- A list of [required materials](#) for the course, including iclickers, the IOLab data acquisition device, and website services we will be using
- The [schedule](#) for the semester, including dates for lectures, discussions, labs, homework assignments, and exams (all exam dates are set except for the final)

Items of note for Week 1: Lecture begins on Monday and Discussion Sections begin on Tuesday of Week 1. Prelecture 1 and Checkpoint 1 are due in [smart.physics](#) at **8am on Monday**, i.e., before you come to Lecture 1.

I hope you have a nice weekend and look forward to our semester in Physics 101 together.

On behalf of the Physics 101 teaching team,

Katie Ansell

Teaching Assistant Professor in Physics

The Grainger College of Engineering

Physics Education Research

303 Loomis Laboratory | 1110 W. Green St. | Urbana, IL 61801
