

Final Exam:

May 9, 8-11am, Loomis 141

- 8-9 questions, covering all material from Week 1 up to and including rotational reference frames
- *No phones, calculators or any electronics!*
- The test will be *closed book*, but you will be provided formula sheets (found on the course webpage) which you can use to perform any calculation.
- Practice finals can be found on the Homework section of the course webpage.
- **Yes**, there will still be Discussion section on Monday (the 30th).
- **Yes**, there will still be office hours this week (May 1-3), and TAs will be present to help with practice exams, and to take questions and clarify ideas.
- **Exam questions are closely related to homework questions!** The best way to study for the final exam is to confirm that you are able to do all the homework questions yourself, *without help from friends or TAs*. The Physics 325 teaching staff will be happy to work with you to address holes in understanding until that is the case.
