

## Homework Assignment #9, Results Section

---

Write the results section for your senior thesis. This section, which describes the scientific results obtained in your research project, should be at least 1000 words (excluding any figures or tables). It should include a complete description of the results obtained and an explicit disclosure of any treatment of the results being reported.

If you are still obtaining data on your project, draw a line at October 15 and report on what you accomplished by that date. (Plans to complete the project may be described in the “future work” section of your thesis.)

In addition to the narrative text, this section must include at least **two figures** that present quantitative data obtained in your project. Each figure must be properly called out in the text, and a descriptive figure caption must be provided.

Due: **Friday, October 30, 9:00 PM**. Assignments submitted after the deadline will be ineligible for rewrite points and will be subject to a 5-points/day late penalty. To qualify for rewrite points, all revisions must be submitted by November 15 for regrading.

Total—50 points

**Notes/Questions to Ask:**
