

Announcements

- CBTF Quiz 5 continues.

□ Upcoming deadlines:

- Friday (11/30)
 - Written Assignment
- Tuesday (12/4)
 - PL HW

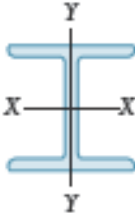

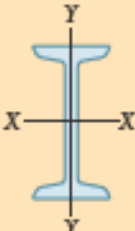

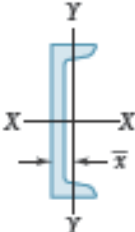

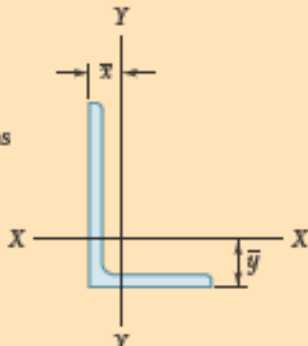

National

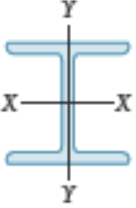

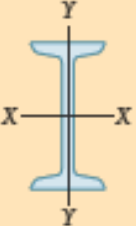

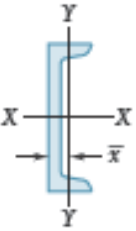

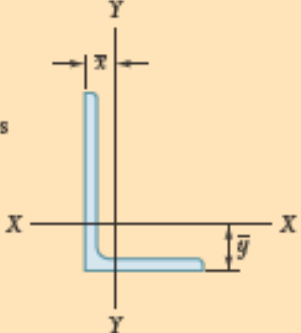

Meth Awareness Day

November 30

Two channels are welded to a rolled W section as shown. Determine the moments of inertia of the combined section with respect to the centroidal x -axis.

	Designation	Area in ²	Depth in.	Width in.	Axis X-X			Axis Y-Y		
					\bar{I}_x , in ⁴	\bar{k}_x , in.	\bar{y} , in.	\bar{I}_y , in ⁴	\bar{k}_y , in.	\bar{x} , in.

Determine the moments of inertia of the bracket with respect to the x - and y -axes.

Figure: 10_P106-107

Vector Mechanics for Engineers: Statics

Moments of Inertia of Common Geometric Shapes

$$I_y = I_z = \frac{1}{12} mL^2$$

$$I_x = \frac{1}{2} mr^2$$

$$I_y = I_z = \frac{1}{4} mr^2$$

$$I_x = \frac{1}{12} m(b^2 + c^2)$$

$$I_y = \frac{1}{12} mc^2$$

$$I_z = \frac{1}{12} mb^2$$

$$I_x = \frac{1}{2} ma^2$$

$$I_y = I_z = \frac{1}{12} m(3a^2 + L^2)$$

$$I_x = \frac{1}{12} m(b^2 + c^2)$$

$$I_y = \frac{1}{12} m(c^2 + a^2)$$

$$I_z = \frac{1}{12} m(a^2 + b^2)$$

$$I_x = \frac{3}{10} ma^2$$

$$I_y = I_z = \frac{3}{5} m\left(\frac{1}{4}a^2 + h^2\right)$$

$$I_x = I_y = I_z = \frac{2}{5} ma^2$$

Virtual Work

Main goals and learning objectives

- Introduce the principle of virtual work
- Show how it applies to determining the equilibrium configuration of a series of pin-connected members

Definition of Work

Work of a force

A force does work when it undergoes a displacement in the direction of the line of action.

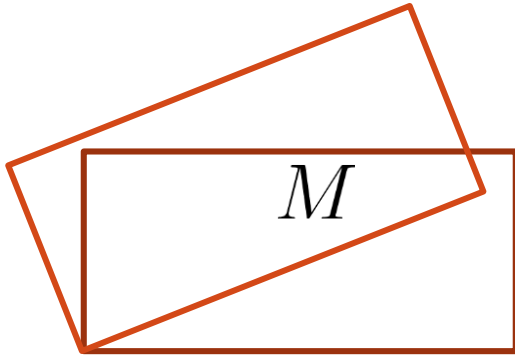

The work dU produced by the force \mathbf{F} when it undergoes a differential displacement $d\mathbf{r}$ is given by

$$dU = \mathbf{F} \cdot d\mathbf{r}$$

Definition of Work

Work of a couple $dU = M \mathbf{k} \cdot d\theta \mathbf{k} = M d\theta$

Virtual Displacements

A *virtual displacement* is a conceptually possible displacement *or* rotation of all *or* part of a system of particles. The movement is assumed to be possible, but actually does not exist.

Principle of Virtual Work

The principle of virtual work states that if a body is in equilibrium, then the algebraic sum of the virtual work done by all the forces and couple moments acting on the body is zero for any virtual displacement of the body. Thus,

The thin rod of weight W rests against the smooth wall and floor. Determine the magnitude of force P needed to hold it in equilibrium.
